Self-Assessment Form for Occupational Health and Safety Performance Disclosure in Corporate Sustainability Reports (Applicable to the Chemical Industry)

Instructions for Completion

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
1. Systematic Management					
1-1. Establishing an Occupational Health and Safety Management System	403-1 403-8	☐ Not established (0%) ☐ Partially Established (30%) ☐ Established (60%)	☐ The scope of system coverage and the number of employees have been publicly disclosed, with explicit reasons provided if not all employees are covered. (10%) ☐ Has obtained verification/certification for Taiwan's TOSHMS (CNS 45001) or ISO 45001 system. (10%) ☐ An information-based management system has been established. (10%) ☐ Quantitative indicators consistent with the OHS policy have been established, and the progress toward achievement has been disclosed. (10%)	• Partially Established: In progress, or only some of the required items have been completed. • Not established: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• OSHMS、ISO 45001、CNS 45001 or other certificates. • Occupational safety and health management manuals, management plans, policy documents, announcements signed by senior executives, official documents, or related regulatory documents. • Online and digital occupational safety and health management system.
2. Risk Assessment and Management					
2-1. Identification, assessment, and control of core occupational hazards (falls, electric shocks, collapse, fire, poisoning, oxygen deficiency).	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%) ☐ Completed (60%)	☐ Systematic approach established for identification, assessment, and control. (10%) ☐ Statistical analysis conducted on the number, percentage of medium-to-high risks, and assessment frequency for each hazard type. (10%) ☐ Controls, improvements, and tracking implemented for high-risk targets. (10%) ☐ Publicly disclosed any of the aforementioned quantitative data or information. (10%)	• Completed: All occupational safety hazards listed in the evaluation indicators must be identified, evaluated, and controlled before they can be checked. If there is no such hazard, it should also be Identify and evaluate as non-dangerous harm. • Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available. • Risk level: It can be graded according to the technical guidelines for risk assessment published by the Occupational Safety and Safety Administration, or adjusted according to the actual status of the enterprise. • Public disclosure channels: such as corporate	• Occupational safety and health hazard identification risk assessment form • Technical guidance on risk assessment

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
				sustainability reports, annual reports, websites, or others external channels.	
2-2. Completed the identification, assessment, and control for each type of occupational health hazard (such as physical, chemical, ergonomic, biological, and psychosocial hazards) individually.	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%) ☐ Completed (60%)	☐ Systematic approach established for identification, assessment, and control. (10%) ☐ Statistical analysis conducted on the number, percentage of medium-to-high risks, and assessment frequency for each hazard type. (10%) ☐ Controls, improvements, and tracking implemented for high-risk targets. (10%) ☐ Publicly disclosed any of the aforementioned quantitative data or information. (10%)	• Completed: All occupational health hazards listed in the evaluation indicators must be identified, evaluated, and controlled before they can be checked. If there is no such hazard, it should also be identified and assessed as non-hazardous. • Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available. • Risk level: can be graded according to the relevant guidelines issued by the Occupational Safety and Safety Administration. • Or adjust according to the actual status of the enterprise	• Occupational safety and health hazard identification risk assessment form. • Physical, chemical, human-caused, biological, and psychosocial hazard identification methods and procedures, record forms. • Technical guidelines for hazardous chemical assessment and grading management. • Guidelines for Human-Induced Hazard Prevention Plans
2-3. Implement Process Safety Management (PSM), including risk assessments and process safety incident records.	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%) ☐ Completed (60%)	☐ A structured or systematic approach has been established to identify, evaluate, and manage potential hazards. (5%) ☐ Process safety incidents, including incident rates and incident severity rates, have been statistically tracked and recorded. (5%) ☐ The number of safety-critical item inspections for processes or equipment has been recorded. (10%) ☐ The effectiveness of the internal process safety culture has been measured through a safety culture questionnaire. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Completed: Requires an assessment and complete relevant records to be checked. • Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Written operating procedures. • Work safety analysis or process safety assessment records. • Safety culture questionnaire. • Process safety management audit records.
2-4. Hazard identification, risk assessment, and job suitability	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%)	☐ A systematic approach has been established to conduct hazard identification, risk assessment, and	• Completed: All specific sensitive groups listed in the evaluation indicators must be identified, evaluated, and controlled before they can be	• Process for identifying workers who are middle-aged, elderly, and at risk of maternal health hazards.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
validation have been completed for specific sensitive worker demographics, such as middle-aged, elderly, and maternal employees under potential health risks.		☐ Completed (60%)	job suitability validation. (10%) ☐ The number or proportion of workers who completed hazard identification, risk assessment, and job suitability validation has been statistically analyzed. (10%) ☐ Occupational safety and health facilities for middle-aged and elderly workers have been improved to enhance their job suitability. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	checked. If there are no people from the group, also It should be identified and evaluated as windless risk. • Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Safety and Health Guidelines for Middle-aged and Senior Workers. • Maternal health protection plan and implementation results (more than 100 people).
2-5. A substitution plan has been planned and implemented for high-risk or hazardous chemicals (such as carcinogenic substances).	403-2	☐ Not Planned (0%) ☐ Partially Planned (30%) ☐ Planned (60%)	☐ Strategies and methods for high-risk or hazardous chemicals have been developed through a systematic assessment. (10%) ☐ Carcinogenic substances are not used (or have been disposed of), or have been completely phased out. (10%) ☐ Specific substitution timelines and targets have been formulated and implemented; enterprises that do not use (or dispose of) such substances are exempt from establishing them. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Planned: Replacement plans have been promoted for high-risk or high-hazard chemicals. If there are no high-risk or high-hazard chemicals, relevant commitments should also be made to chemical management. • Partially Planned: In progress, or only some of the required items have been completed. • Not Planned: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	
2-6. Container labeling, Safety Data Sheet (SDS) disclosure, and various hazard communication measures have been implemented for hazardous chemicals.	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%) ☐ Completed (60%)	☐ A systematic approach has been established to conduct chemical hazard identification. (10%) ☐ The accuracy of Safety Data Sheet (SDS) contents has been verified either internally (self-assessment) or by a third party. (10%) ☐ Hazardous chemicals are not used (or	• Planned: Container labeling, safety data sheets and various general information measures have been carried out for hazardous chemicals. those who have conducted an inventory to confirm that there are no chemicals can also be checked. • Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available.	• List of hazardous chemicals. • Safety Data Sheet (SDS). • Container hazard labeling. • Workplace labeling.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			have not been managed/disposed of), or have been completely phased out. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	
2-7. Exposure assessments, including working environment monitoring, have been implemented.	403-2	☐ Not Implemented (0%) ☐ Partially Implemented (25%) ☐ Implemented (50%)	☐ A systematic or hierarchical exposure assessment methodology has been adopted for hazardous chemicals. (10%) ☐ The implementation frequencies and results of exposure assessments have been statistically tracked and analyzed. (10%) ☐ Improvements and follow-ups have been implemented based on exposure assessment results, and high-risk operations have been minimized to the furthest extent possible. (10%) ☐ The monitoring results for chemicals all fall under Level 1 Management. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Implemented: In progress, or only some of the required items have been completed. • Not Implemented: Not yet started, or no relevant implementation records are available. • Assessment results and risk level: Please refer to the Regulations for the Assessment and Classification of Hazardous Chemicals and its related guidelines. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Environmental monitoring plan, monitoring report or quantitative estimation report. • Regulations for the Assessment and Classification of Hazardous Chemicals and Related Guidelines.
2-8. Procedures for investigating occupational accidents and incidents have been established.	403-2	☐ Not Established (0%) ☐ Partially Established (30%) ☐ Established (60%)	☐ Utilized the hierarchy of controls to determine corrective actions and improvement measures. (10%) ☐ Compiled occupational hazard investigation reports and analyzed corrective action ratios. (10%) ☐ Planned and established permanent prevention measures for occupational accidents. (10%) ☐ Publicly disclosed any of the aforementioned quantitative data or	• Partially Established: In progress, or only some of the required items have been completed. • Not Established: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Occupational accident handling procedures and accident record forms. • Investigation report, correction ratio. • Online, digital survey records.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			information. (10%)		
2-9. Established emergency prevention, preparedness, and response plans, and regularly conducted drills.	403-2	☐ Not Completed (0%) ☐ Partially Completed (30%) ☐ Completed (60%)	☐ Analyzed session counts and participant numbers for various hazard awareness campaigns. (10%) ☐ Analyzed the number of implemented drills and participant counts. (10%) ☐ Included surrounding residents to jointly participate in drills. (10%) ☐ Publicly disclosed any of the aforementioned quantitative data or information. (10%)	• Partially Completed: In progress, or only some of the required items have been completed. • Not Completed: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Technical guidance on emergency response measures. • Education and training course schedules, student rosters, and sign-in records.
3. Worker Participation					
3-1. Establish an Occupational Safety and Health Committee	403-4	☐ Not Established (0%) ☐ Partially Established (30%) ☐ Established (60%)	☐ Legally established the Committee, set up operational mechanisms, conducted regular meetings, and recorded meeting frequencies. (15%) ☐ Worker participation from non-management staff outperformed legal requirements. (15%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Established: In progress, or only some of the required items have been completed. • Not Established: Not yet started, or no relevant implementation records are available. • Occupational Safety and Health Committee: The establishment content can refer to the Occupational Safety and Health Management Regulations. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Occupational Safety and Health Committee roster and meeting minutes.
3-2. Workers actively participate in the revision of occupational safety and health policies, discussions on related proposals, and consultation and communication processes.	403-4	☐ Not Participated (0%) ☐ Partially Participated (25%) ☐ Participated (50%)	☐ Diversified or multi-faceted communication channels have been established. (10%) ☐ Procedures for increasing worker participation and their corresponding evaluations have been formulated (10%) ☐ The effectiveness of worker participation and communication has been evaluated (10%) ☐ The completion rate of relevant proposals established based on consultation and communication outcomes has been statistically	• Partially Participated: In progress, or only some of the required items have been completed. • Not Participated: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Occupational Safety and Health Committee Meeting Minutes

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			analyzed. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)		
4. Education and Training					
4-1. Relevant occupational health and safety education and training are provided to workers.	403-5	☐ Not Provided (0%) ☐ Partially Provided (25%) ☐ Provided (50%)	☐ A mechanism is in place to identify training needs and content, such as through questionnaires and worker communication. (10%) ☐ Diversified education and training channels, including physical and online platforms, have been established or provided. (10%) ☐ An internal trainer training and evaluation mechanism has been established to enhance the quality of education and training (10%) ☐ The number of sessions and frequency of education and training programs implemented have been statistically analyzed. (5%) ☐ The number of worker participants (person-times) and total training hours have been statistically analyzed. (5%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Provided: In progress, or only some of the required items have been completed. • Not Provided: Not yet started, or no relevant implementation records are available. • Occupational health and safety education and training: Generally refers to relevant courses that are not regulated by laws and regulations. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Education and training course schedules, student rosters, sign-in records, and on-the-job education and training records.
4-2. The implementation effectiveness and satisfaction levels of education and training programs have been evaluated.	403-5	☐ Not Evaluated (0%) ☐ Partially Evaluated (30%) ☐ Evaluated (60%)	☐ A mechanism encompassing the methods, results, and corresponding response measures for evaluating training effectiveness has been established. (15%) ☐ The percentage of workers' awareness enhancement and their satisfaction levels have been statistically analyzed. (15%)	• Partially Evaluated: In progress, or only some of the required items have been completed. • Not Evaluated: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Education and training employee satisfaction survey records.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)		
5. Health Services and Promotion					
5-1. General and special health (physical) examinations are provided to workers.	403-3	☐ Not Provided (0%) ☐ Partially Provided (30%) ☐ Provided (60%)	☐ The frequency or items of general and special health (physical) examinations exceed regulatory requirements. (10%) ☐ Health examination data has been systematically managed to track and monitor multi-year trends. (10%) ☐ A high-risk watch list has been established, accompanied by corresponding improvements and control measures. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Provided: In progress, or only some of the required items have been completed. • Not Provided: Not yet started, or no relevant implementation records are available. • General and special health (physical) examinations: Relevant regulations can refer to the labor health protection rules. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Analysis and evaluation of workers' physical (health) examination results, and health management suggestions. • Follow-up management and health guidance for those with abnormal health examination results.
5-2. Health service strategies are formulated, accompanied by the allocation of appropriate medical and nursing personnel.	403-3	☐ Not Formulated (0%) ☐ Partially Formulated (30%) ☐ Formulated (60%)	☐ The allocation quantity or service frequency of labor health service personnel exceeds regulatory requirements. (15%) ☐ The budget targets and implementation rates allocated for labor physical and mental health services have been statistically analyzed. (15%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Formulated: In progress, or only some of the required items have been completed. • Not Formulated: Not yet started, or no relevant implementation records are available. • Medical staff allocation: Relevant regulations can refer to the labor health protection rules. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Labor Health Protection Program. • Health Service Strategy Documents, Occupational Safety and Health Work Rules, and Occupational Safety and Health Management Measures. • Hire medical staff licenses and rosters.
5-3. Health service activities, such as labor health education, health guidance, and workplace health promotion activities, are conducted.	403-6	☐ Not Conducted (0%) ☐ Partially Conducted (35%) ☐ Conducted (70%)	☐ Diversified health promotion activities have been designed based on the characteristics and health conditions of different demographic groups within the company. (10%) ☐ The number of sessions of activities	• Partially Conducted: In progress, or only some of the required items have been completed. • Not Conducted: Not yet started, or no relevant implementation records are available. • Scope of application: To promote workers overall health, both at work and non-work Related topics are included.	• Health education activities, internal announcements, official documents and publicity, such as health check-ups Psychological stress surveys, etc • Activity records, including event documents, videos, and audio-

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			conducted, the frequency of health services provided, and satisfaction levels have been statistically analyzed. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	visual activities
5-4. Consultation and assistance programs for workers' physical and mental health have been established.	403-6	☐ Not Established (0%) ☐ Partially Established (35%) ☐ Established (70%)	☐ Consultation services have been implemented, and the number of participants (person-times) provided with consultation has been statistically analyzed. (10%) ☐ Assistance programs based on consultation outcomes have been implemented, and their implementation proportions have been statistically analyzed. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Established: In progress, or only some of the required items have been completed. • Not Established: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Records of the planning and implementation of health education, health guidance, physical and mental health protection, health promotion and other measures for workers.
6. Supply Chain/Value Chain Impact Management					
6-1. Suppliers or contractors are required to pass management system certifications or specific product certification standards (such as ISO/CNS 45001, TOSHMS, RoHS, or restrictions on hazardous substances)	403-7	☐ Not Required (0%) ☐ Partially Required (30%) ☐ Required (60%)	☐ The requirements for suppliers or contractors have been publicly disclosed and declared. (10%) ☐ All suppliers or contractors have established management systems or complied with specific product standards. (10%) ☐ All suppliers or contractors have passed management system certifications or obtained specific product certifications. (10%) ☐ Any of the aforementioned consolidated quantitative data or information regarding suppliers or contractors has been publicly disclosed. (10%)	• Requested: You can fill in only if there is a requesting supplier. Whether the supplier achieves it is checked in the bonus points. • Partially Required: In progress, or only some of the required items have been completed. • Not Required: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Supply chain code of conduct. • Contractor's occupational safety and health responsibility specification. • Written form for supplier review/appraisal/evaluation.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
6-2. A systematic assessment and screening mechanism has been established for suppliers and contractors.	403-7	☐ Not Established (0%) ☐ Partially Established (35%) ☐ Established (70%)	☐ It has been specified that the systematic assessment and screening mechanism covers the occupational safety and health management status of suppliers and contractors. (10%) ☐ Assessment criteria, critical supplier screening conditions, or quantitative evaluation mechanisms have been established. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Established: In progress, or only some of the required items have been completed. • Not Established: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Technical Guidelines for Procurement Management. • Contractor's occupational safety and health responsibility specification. • Written form for supplier review/appraisal/evaluation. • Supplier screening and grading mechanism. • Supplier OHS performance evaluation system. • Provider OHS Coaching Program.
6-3. Relevant awareness campaigns and education and training programs are conducted for suppliers and contractors.	403-7	☐ Not Established (0%) ☐ Partially Established (35%) ☐ Established (70%)	☐ Resources have been invested to mentor and support suppliers/contractors in their occupational safety and health management. (10%) ☐ The number of awareness campaigns and training sessions conducted for suppliers, along with supplier participation rates, have been statistically analyzed. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Established: In progress, or only some of the required items have been completed. • Not Established: Not yet started, or no relevant implementation records are available. • Education, training and publicity: Generally refers to relevant courses and publicity that are not regulated by laws and regulations. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Provider OHS Coaching Program. • Education and training course schedules, student rosters, and sign-in records.
6-4. A commitment to safe and sustainable products has been made for our product offerings.	403-7	☐ Not Committed (0%) ☐ Partially Committed (35%) ☐ Committed (70%)	☐ It has been publicly disclosed and declared. (30%)	• Partially Committed: In progress, or only some of the required items have been completed. • Not Committed: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as enterprise Yong Continued reports, annual reports, websites, or others external channels.	• Commitment to safe and sustainable products and services. • Operations Management and Product or Service Overview.
6-5. Risk and hazard assessment and management are conducted for chemicals contained	403-7	☐ Not Conducted (0%) ☐ Partially Conducted (35%) ☐ Conducted (70%)	☐ The revenue proportion of products classified under GHS Health and Environmental Hazards Categories 1 and 2, relative to the total revenue of all products, has been calculated.	• How to Proceed: The process of assessing and managing risks associated with the hazards of chemical substances in products. This may include, but is not limited to: disclosing how to ensure products comply with restricted	• Corporate RSL Chemical Restriction/Prohibition List

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
in products.			(10%) ☐ The proportion of disposing of or using products classified under GHS Health and Environmental Hazards Categories 1 and 2 has been decreased year by year. (10%) ☐ It has been publicly disclosed and declared. (10%)	substance regulations, lists (RSL), or certification procedures; chemical management methodologies throughout various stages of the product lifecycle; the arrangement of third-party certification bodies to verify product chemical compositions; and the planning or effectiveness of introducing alternative chemicals. Through the application of recognized domestic and international standards or certifications, the goal is to ensure that manufactured products pose no health or safety hazards to downstream users. • Partially Conducted: In progress, or only some of the required items have been completed. • Not Conducted: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	
7. Occupational Injuries and Work-related Diseases					
7-1. Disabling Injury Frequency Rate (FR), Disabling Injury Severity Rate (SR), and annual occupational injury rate per thousand workers are analyzed, accompanied by corresponding elimination or prevention and control measures.	403-9	☐ Not Analyzed (0%) ☐ Partially Analyzed (25%) ☐ Analyzed (50%)	☐ Data including the Disabling Injury Frequency Rate (FR), Disabling Injury Severity Rate (SR), and annual occupational injury rate per thousand workers have been statistically analyzed. (5%) ☐ The number of near-miss incidents has been statistically analyzed. (5%) ☐ An incentive mechanism for near-miss reporting has been established. (10%) ☐ Preventive and control measures have been implemented, resulting in a year-by-year decrease in safety indices or successfully maintaining them at zero. (10%) ☐ The positive impacts of occupational injury/illness prevention and workplace accident prevention have been monetized into value,	• Partially Analyzed: In progress, or only some of the required items have been completed. • Not Analyzed: Not yet started, or no relevant implementation records are available. • Positive impact converted into value: can be based on the company's industry characteristics, such as attention The types of high-risk occupational diseases and theirs medical costs and direct and indirect costs that have a significant impact on the company, and the development company is used to estimate its sustainable value/Calculation mode of social cost. or refer to international calculation recommendations, such as the US Occupational Safety and Safety Administration's costing recommendations (https://www.osha.gov/safetypays /estimator) 。 • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Evaluation method flow. • Disabling damage frequency, disabling damage the severity rate is the same as the annual rate of occupational accidents record form. • Labor injury and illness records • Disclosure of improvement plans or improvement plans. • Occupational safety and health investment budget and cost. • ROI return on investment estimate.

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			connecting occupational safety and health with financial performance through the concept of sustainability value. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)		
7-2. Analyzed confirmed occupational diseases (diagnosed by specialists) and suspected work-related illness cases, and implemented preventive controls.	403-10	☐ Not Analyzed (0%) ☐ Partially Analyzed (30%) ☐ Analyzed (60%)	☐ The number and rate of work-related fatalities and illnesses have been statistically analyzed, with the total case count officially recorded. (10%) ☐ Preventive and control measures have been implemented, resulting in a decrease in indices compared to the previous year or successfully maintaining them at zero. (10%) ☐ The positive impacts of occupational injury/illness prevention and workplace accident prevention have been monetized into value, connecting occupational safety and health with financial performance through the concept of sustainability value. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Analyzed: In progress, or only some of the required items have been completed. • Not Analyzed: Not yet started, or no relevant implementation records are available. • Scope of Analysis: Both confirmed and suspected occupational disease cases may be included in this evaluation metric. • Positive impact converted into value: It can be based on the characteristics of the company's industry, such as focusing on the types of high-risk occupational diseases and their medical costs, as well as the direct and indirect costs that have a significant impact on the company and development companies for estimation its sustainable value/Calculation mode of social cost. or refer to international calculation recommendations, such as the US Occupational Safety and Safety Administration's costing recommendations (https://w ww.osha.gov/safetypays /estimator ）。 • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or others external channels.	
7-3. Safety and health equipment and relevant preventive measures are provided to address physical and chemical hazards.	403-10	☐ Not Provided (0%) ☐ Partially Provided (35%) ☐ Provided (70%)	☐ The number and proportion of equipment improvements implemented have been statistically analyzed. (10%) ☐ The proportion of hazards for which preventive measures have been implemented has been statistically analyzed. (10%)	• Partially Provided: In progress, or only some of the required items have been completed. • Not Provided: Not yet started, or no relevant implementation records are available. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Checklists and Inspection Sheets. • Operation process and management plan • Relevant guidelines issued by the Occupational Safety and Safety Administration, such as: Guidelines for Respiratory Protection Plans and Measures, Reference Guidelines for the

Assessment Indicators	GRI 403 Guidelines	Assessment Results		Assessment Instructions	Reference Documents (including but not limited to)
		Implementation Status (Single choice)	Bonus Items (Multiple choice)		
			☐ Any of the aforementioned quantitative data or information has been publicly disclosed (10%)		Selection of Chemical Skin Protective Equipment, and Heat Hazard Predictions for Workers in High-Temperature Outdoor Operations Prevention guidelines
7-4. For operations involving shift work, night work, or prolonged working hours, assessments and disease prevention measures are implemented to prevent workers from developing illnesses triggered by exceptional workloads.	403-10	☐ Not Implemented (0%) ☐ Partially Implemented (35%) ☐ Implemented (70%)	☐ The number or proportion of workers whose risk levels for work-related brain and cardiovascular diseases are classified as medium-to-high risk has been statistically analyzed. (10%) ☐ Assessments and hazard prevention measures have been implemented. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Implemented: In progress, or only some of the required items have been completed. • Not Implemented: Not yet started, or no relevant implementation records are available. • Assessment and prevention: Refer to the guidelines for the prevention of diseases caused by abnormal workload issued by the Occupational Safety and Safety Administration to conduct assessment and prevention. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Guidelines for the prevention of abnormal workload-induced diseases. • Safety and health guidelines for night work in the workplace.
7-5. Assessments and preventive measures are implemented for maternal health protection in the workplace.	403-10	☐ Not Implemented (0%) ☐ Partially Implemented (35%) ☐ Implemented (70%)	☐ The number or proportion of workers whose maternal health risk levels are evaluated as medium-to-high risk has been statistically analyzed. (10%) ☐ Assessments and hazard prevention measures have been implemented. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Implemented: In progress, or only some of the required items have been completed. • Not Implemented: Not yet started, or no relevant implementation records are available. • Assessment and prevention: Refer to the technical guidelines for maternal health protection in the workplace published by the Occupational Safety and Safety Department to conduct assessment and prevention. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites, or other external channels.	• Technical guidelines for maternal health protection.
7-6. For operations involving repetitive tasks, assessments and disease prevention measures are implemented to prevent workers from developing musculoskeletal disorders.	403-10	☐ Not Implemented (0%) ☐ Partially Implemented (35%) ☐ Implemented (70%)	☐ The number or proportion of workers whose assessment results indicate suspected ergonomic hazards has been statistically analyzed. (10%) ☐ Assessments and hazard prevention measures have been implemented. (10%) ☐ Any of the aforementioned quantitative data or information has been publicly disclosed. (10%)	• Partially Implemented: In progress, or only some of the required items have been completed. • Not Implemented: Not yet started, or no relevant implementation records are available. • Assessment and prevention: Refer to the guidelines for the human-induced hazard prevention plan published by the Occupational Safety and Safety Administration to conduct assessment and prevention. • Public disclosure channels: such as corporate sustainability reports, annual reports, websites,	• Guidelines for Human-Induced Hazard Prevention Plans.
